Art Unit: 1732

DETAILED ACTION

1. Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Step d of claim 1 is confusing because it is unclear if the insert is actually just the formed blank metal substrate. The specification discloses that the insert is the formed blank metal substrate and the cured elastomeric material at predetermined portions of the formed blank metal substrate.

Clarification and/or correction is required.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Decker (USPN 4096228) as set forth in the previous Office action mailed 1/12/04.
- 4. Claim 11 is rejected under 35 U.S.C. 102(b) as being anticipated by Decker (USPN 4096228). Decker teaches the claimed process as evidenced at col 2, Ins 40-50; col 3, Ins 4-7 and 17-18; col 4, Ins 36-60; col 5, Ins 7-30; and figs 1-5. As a note, figs 4-5 show a metal insert 11 as evidenced by the hatchings of insert 11. See MPEP 608.02.
- 5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 1732

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. Claims 6-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Decker (USPN 4096228) as set forth in the previous Office action mailed 1/12/04.
- Applicant's arguments filed 1/12/04 have been fully considered but they are not 7. persuasive. Applicant argues that Decker does not teach using a metal substrate; using a blank; and using an elastomeric material. In regard to a metal substrate, Decker teaches using any conventional gasket material (col 3, Ins 17-18). Further, Decker teaches the use of a metal substrate as evidenced by the hatchings of component 11 in figs 4-5. See MPEP 608.02 for the definitions of hatchings. In regard to using a blank, the term blank mere means a piece of material prepared to be made into something. A step of performing a material does not exclude the preformed material from being called a blank if the preformed material is subsequently formed into something. Here, component 11 is subsequently deformed within the mold to form a part of a gasket having a specific shape. In regard to using an elastomeric material, Decker teaches the injected material being an elastomeric material (col 3, lns 34-46). The mere fact that the injected material is not as compressible as component 11 does not exclude the material from being an elastomer. In regard to claims 6-10, Applicant argues that the design limitations are not a mere obvious matter of choice and the examiner has not shown the limitations to be well-known. Each Budovec et al (USPN 6562573), Engelhardt (USPN 3619458), and Jeanne et al (USPN 5618050), as provided with the Office action mailed 10/3/03, teaches the gasket designs.

Art Unit: 1732

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to EDMUND H. LEE whose telephone number is 571.272.1204. The examiner can normally be reached on MONDAY-THURSDAY FROM 9AM-4PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Colaianni can be reached on 571.272.1196. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
